**RE: Ministry of Education: Development of models and recommendations
on medium term infrastructure plan**

Notice 1 – Answers to Queries received

Reference no.	Query	Answer
1	What is the approximate budget, or expected range of prices, for this task?	We are going to market to ascertain this with a wide budget range possible. Value for money is the primary consideration of any CIG tender. The open competitive tender process allows the market to respond. Accordingly we do not limit the task to budget but look for the supplier that provides.
2	Is there up to date written reports on the current state of all education infrastructure? If not, on what proportion are there up to date current status reports?	No. The actual buildings currently used in the sector are not part of any overall current report. This work is more about methodology and approaches (including criteria) on which we would then build our own report, not doing the actual report itself.
3	Is it envisaged that the task will involving visiting education infrastructure in either the Northern or Southern groups of the pa enua	No. Possibly southern Pa Enua to gauge the social considerations that would need to be included in a framework but not for actual infrastructural work. where this is finalised prior to the annual appropriation
